

## ABSTRACT:

Substituted and Fused pyridazines having angiogenesis inhibiting activity and the generalized structural formula

5 wherein the ring containing A, B, D, E, and L is a nitrogen-containing heterocycle; groups  
 X and Y may be any of a variety of defined linking units; R<sup>1</sup> and R<sup>2</sup> may be defined  
 independent substituents or together may be a ring-defining bridge; ring J may be an aryl,  
 pyridyl, or cycloalkyl group; and G groups may be any of a variety of defined  
 substituents. Pharmaceutical compositions containing these materials, and methods of  
 10 treating a mammal having a condition characterized by abnormal angiogenesis or  
 hyperpermeability processes using these materials are also disclosed.
